

IODINE

- Iodine is needed for our body's physical and mental development.
- Our bodies don't make iodine; we must get it in the foods we eat.
- Pregnant and breastfeeding women need 220 - 250 mcg of iodine.
- Very little iodine is found naturally in foods.
- Use iodized salt and take a prenatal/multi-vitamin with at least 150 mcg.

When shopping, buy iodized salt.

Supplement Facts

Serving Size - 1 capsules
Servings per Container - 90

	Amount per Serving	% Daily Value
Iodine (as potassium iodide)	150mcg	100%
Zinc (Chelazome®, zinc amino acid chelate)	15mg	100%
Selenium (from L-selenomethionine)	400mcg	571%
Copper (Chelazome®, copper amino acid chelate)	2mg	100%

Dear Colleague,

The Washington State Department of Health (DOH) provides print-ready files (PDFs) of health education materials. To ensure that the original quality of the piece is maintained, please read and follow the instructions below and the specifications included for professional printing.

- **Use the latest version.** DOH materials are developed using the most current information available, are checked for clinical accuracy, and are field tested with the intended audience to ensure they are clear and readable. DOH programs make periodic revisions to educational materials, so please check this web site to be sure you have the latest version. DOH assumes no responsibility for the use of this material or for any errors or omissions.
- **Do not alter.** We are providing this artwork with the understanding that it will be printed without alterations and copies will be free to the public. Do not edit the text or use illustrations or photographs for other purposes without first contacting us. Please do not alter or remove the DOH logo, publication number or revision date. If you want to use a part of this publication for other purposes, contact the Office of Health Promotion first.
- **For quality reproduction:** Low resolution PDF files are intended for black and white or color desktop printers. They work best if you are making only one or two copies. High resolution PDF files are intended for reproducing large quantities and are set up for use by professional offset print shops. The high resolution files also include detailed printing specifications. Please match them as closely as possible and insist on the best possible quality for all reproductions.

If you have questions, contact:
Office of Health Promotion
